

SIM API Test Suite loaded in PowerScript: the test certificate shows the outcome of a recently run test.

SIM API Test Suite tests cards in accordance with 51.013, “TestSpecification for Subscriber Identity Module (SIM) Application Programming Interface (API) for Java Card”.

Over 160 tests to quickly identify non-compliant SIM cards.

The tests cover:

- sim.access package
- sim.toolkit package
- SIM Toolkit framework

Prerequisites

- Aspects PowerScript or Aspects Card Verifier
- SmartStation3 or SC/PC card reader

Supported Operating Systems

Windows XP and later
